

June 8th, 2020

Dear Community Lighting Customer,

As a valued customer, we are writing to update you on the recent rate case and how it could impact your community. Per the 2016 energy legislation, the Michigan Public Service Commission (MPSC) requires a 10-month review of any rate case. This case followed that process and was submitted in July 2019. Following this review, the MPSC approved new rates for DTE Energy electric customers. The new rate was effective May 15th, 2020:

- A municipal streetlight customer is expected to see an average 4% increase in their monthly streetlight bills

Amid the health and financial hardships that many Michiganders are experiencing because of the COVID-19 pandemic, DTE is taking several measures to assist its customers:

- DTE has extended its service protection period until at least June 12th and is providing between \$30 to \$40 million in bill relief for all electric customers during the months of June and July which are typically peak summer usage months
- The power supply recovery cost relief will be reflected on June and July bills

For those cities that made a proactive and prudent investment in energy efficient LED fixtures over the past five years, the city will continue to see an approximate 35-40% savings in their streetlight bill.

We value our partnership with your municipality and look forward to hearing any concerns that you may have regarding this rate case or any other issue. For additional information, please contact your assigned Account Manager or call us at 800.548.4655.

You can also email your questions to comm_lighting@dteenergy.com.
